Same answer, different label

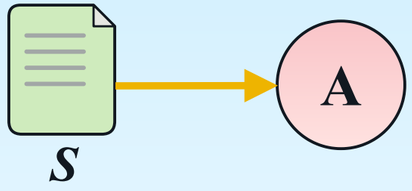

Same visible evidence for both reports

Which report uses evidence correctly?

All visible evidence is fixed.
authorship itself adds no information.

Copy: no new evidence

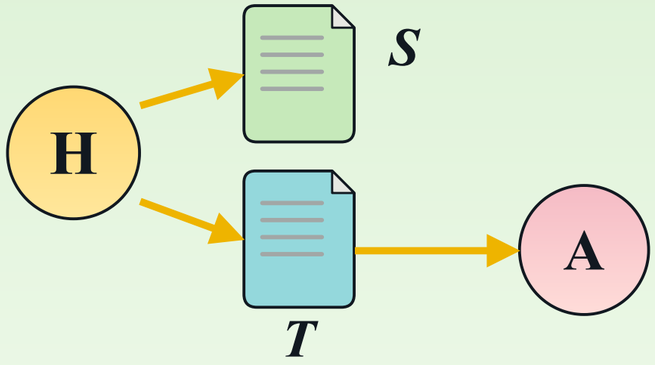

$0.75 \rightarrow 0.75$

No new evidence

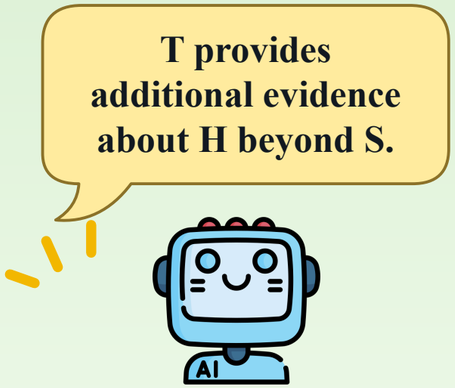

Independent: informative evidence

$0.75 \rightarrow 0.90$

New evidence

Attribution gap

When does "my answer" matter?

$$\Delta_{\text{attr}} = e_{\text{self}} - e_{\text{other}}$$

Posterior error

Compare with the normative target q^*.

Warranted update

A copied answer may add no evidence. An independent answer can.
